

HUMAN BIO ELECTRONICS

CAN IT BE EXPLAINED – SHOWN – USED?

YES!

WELCOME TO A QUANTUM ENERGY MEDICINE SEMINAR

This seminar will provide scientific information in biophysics, that is leading us to deeper understandings of life, disorder and disease.

At KTH, Kungliga Tekniska Högskolan www.kth.se (The Royal Institute of Technology)
Main Campus, Hall F1, Valhallavägen 79, **Stockholm, Sweden**
The 28-29th of April 2006, start 9.30 the 28th.

**Main lecturer Dr James Oschman, Ph.D. Nature's Own Research Association, USA.
For the first time in Sweden**

Dr J. Oschman is a pioneer in energy medicine, internationally accepted researcher, cell biologist, biophysicist and author. He is one of the few academic scientists who has explored the scientific basis for complementary and quantum medicine.

His work gives us a great deal of scientific information that provides logical explanation how different energy-based therapies and quantum medicine devices works. The basic field of his research is biophysics. This is the application to biological systems of the precise language and concepts of physics.

He has published 26 full-length scientific articles in academic scientific journals and 40 articles in complementary therapy journals. Combining this information with the latest developments in basic science and clinical medicine is leading us to deeper understandings of life, disease and disorder.

In his lectures, he will provide us with information about the body's energy field. During the past 40 years, scientific evidence has steadily accumulated that shows the human body does indeed produce various kinds of energy fields and that these fields have important roles in biology.

An important breakthrough at the cellular level is the discovery of the continuity between the cytoskeleton and nuclear matrix, inside the cell and the extra cellular matrix or connective tissue outside of the cell. It provides a basis for a whole-body communication system involved in the regulation of a variety of important processes, including the healing response. This whole system now called "the living matrix", is composed of semi conducting liquid crystals. Modern research into molecular nanoelectronics is helping us understand the sophisticated communication and information processing taking place within the living matrix. This new information is providing the basis for energy medicine, a variety of therapies and quantum technology.

Dr Thornton Streeter, DSc, The Center for Biofield Sciences

He is an English researcher, who spent over 15 years specialising on researching the Human biophysical energy field, with focus on detection and documentation of the anatomy and physiology of the human energy field.

His goal is to integrate modern medicine with holistic thoughts. He is a consultant to the Indian government, to establish this integration in the Indian teaching of medical doctors.

Dr Streeter will show fascinating material from his different methods of scientific investigations of energy fields in human and other living material.

www.biofieldsciences.com

Prof. Leif G. Salford, Neurosurgeon at Lund University Hospital in Lund, Sweden.

He will present his research on nerve cell damage in mammalian brain after exposure to microwaves from GSM mobile phones.

This is the largest human biological experiment ever. So has the voluntary exposure of the brain to microwaves from cell phones by one fourth of the world's population been called. The possible risks of radio frequency electromagnetic fields for the body, is a growing concern for society.

www.radfys.lu.se

Prof. Karl E. Arfors, former research director of Pharmacia Uppsala, initiated research of free radicals and antioxidants into reperfusion and inflammation. He is a specialist in cellular microcirculation and inflammation and developed a laboratory Experimental Medicine and institute in La Jolla California. He is today lecturing at Karolinska Institute in Stockholm about evidence based vitamins and free fatty acids (Ω 6 and Ω 3)

New experiences regarding atherosclerosis, cholesterol and inflammation will be shown, He will in his lecture, give information about the food our body likes, important information for preventing illness.

Prof. Arfors will also compare the classical reductionistic medical research with the holistic thinking, an important step in the coming paradigm change from Newton (where molecules are finding the receptor) to Quantum Physics where frequencies from molecules are directing and activating receptors and taking control in a system as Quantum Medicine.

Thomas Aksnes, President SCIO Norge as

Thomas is the pioneer of Quantum Medicine in Norway. He is experienced with therapy, theory and training using this technology.

He will explain how they combine the various Quantum Medical Equipments in the 62 specialised Quantum Medical Clinics in Norway

www.kvantemedisin.no

Boris Aranovich, MR AB

Researcher, author and teacher, former headmaster at the university of Alternative medicine in St. Petersburg. Boris will report from Energy Medicine research in Russia and the background to the millimetre wave communication technique.

www.mdrcenter.nu

Panel discussion

How Quantum Medicine can be used to help health care to improve health.

Workshop and training in different Quantum technologies and instruments will be offered Friday night.

Together with the seminar there will be an exhibition with different technologies and products.

Welcome to the seminar, and at the same time take the opportunity to visit the beautiful capital of Sweden, Stockholm. www.stockholm.se

Price for the 2 day seminar:

180 € or 1600 SEK, including lunches and fruit, tea/coffee

Register

Please send your registration to xede@wanadoo.fr as soon as possible before 10th of april, and we will send you an invoice. You can also pay cash at the entrance.

Important that you give us a message that you will come so we can order lunch, coffe/tea.

For more information see www.xede.fr where you also can see upgrades of the program.

Organizer: XEDE International SARL

Mimmi och Bertil Weyde, in cooperation with Prof. Arfors

Tel. +33(0) 607494058 or +46(0)87318014
